Voices of Local Minorities

The 2018 Summer Lectures highlight three local minority communities: Asian-American, Latino/Latina, and Trans-gender/Trans. The series explores how members of these minority groups perceive their place in the larger community. Do they feel isolated or do they feel strengthened by shared interests and commonalities? What are the challenges of being other? What local resources bring people together, foster pride, and build supportive networks? An After Five event during July brings additional voices to the discussion.
